BOTTOM PAINTING

Due to strict New York State Department of Environmental Conservation regulations and laws only Certified Marina personnel will be able to apply antifouling paint to boat bottoms in the Marina. No owners will be allowed to paint their bottoms.

Sunset Harbour Marina uses single season ablative as a standard bottom paint. Other paints are available upon request at additional cost. Please allow additional time to obtain other paints.

DETAILING SERVICES

CANVAS INSTALLATION: Other than mooring cover (which is part of Shrink Wrap Service.)

COMPLETE DETAIL: Wash and clean entire boat, wax hull and all smooth fiberglass and/or smooth painted surfaces on topsides, polish stainless steel, clean canvas, clean windows, clean carpets, clean and dress vinyl upholstery, clean all compartments and fish boxes, and general cleaning (not detailing) of bilge/engine room. Inside cabin is not included.

TOPSIDES DETAIL: Wash and clean entire boat, wax all smooth fiberglass and/or smooth painted surfaces above and including the rub rail, polish stainless steel, clean canvas, clean windows, clean carpets, clean and dress vinyl upholstery, clean all compartments and fish boxes, and general cleaning (not detailing) of bilge/engine room. Inside cabin is not included.

HULL WAX: Clean and wax all surfaces from the water line to the rub rail. If the boat does not have bottom paint, then the water line will be assumed.

COMPOUND: Heavy cutting polish with mild abrasives to restore the boats finish and prepare it for waxing. Generally, boats more than 4 years old will require compounding. It is applied by hand or machine to all smooth fiberglass surfaces which helps remove oxidation, stains and light scratches from surface.

MACHINE POLISH: Fine buffing polish used to bring out a deeper shine and remove swirl marks caused by heavy machine compounding. This is a finish product applied by machine usually after compound and before wax. Boats that are heavily oxidized and/or boats that are finished in rich colors (red, blue, black, etc.) may require this step before wax. In some cases, this product may be used in lieu of compounding.

DETAILED WASH: Wash and clean entire boat including windows, vinyl upholstery, compartments, fish boxes, and vacuum carpets. Helm station or inside helm area is dried. Inside cabin is not included.

TEAK SERVICE: Strip old oil from teak, apply teak brightener and fresh oil/sealer. No sanding.

CABIN SERVICE: Clean counter tops, tables, seats, windows, head, refrigerator, ice maker, microwave, and mirrors. Complete vacuum and dusting. Mold removal and carpet shampooing is not included. Inside compartments upon request only.

CARPET CLEANING: Hot water extraction machine.

FLYBRIDGE & MOTORYACHT: Raised aft cabin or boats with upper bridge areas or enclosed upper helm area.

TUNA TOWER: Raised aluminum or stainless steel structure which may include a small open helm station.

MAST STEPPING

Includes hookup of all stays to the mast only. Tune up of mast, stays, hook up of boom, installing of sails are additional (Call for pricing.)
